Ocala Fl 34482

The purpose of this letter is to recommend your company based on our experience with your company. As you know I was a new resident in Ocala, FL with many projects to complete at Little Tree Farm and it was imperative that I selected the right team from the start. We needed to build new homes from the ground up, remodel existing homes and transform spaces from one use to another. What you might not know is growing up with a family in development I was very aware of what could go wrong selecting the wrong team. I interviewed at least 10 companies and spoke to a dozen more prior to selecting Tallen Builders as my go to team. I could not be more pleased with my decision!

I am grateful for the ability to contact you or your team anytime. You & your team readily responded to my request, solved any concern I was having promptly no matter how large or small. You stayed on schedule even when the supply chain disruptions were delaying other projects in town 6+ months and within estimated cost (plus approved change orders). The job site was kept clean and orderly and the ability to work around the horses with care and concern was ideal. The work was done thoroughly and with the highest of quality.

Tallen Builders not only has an unbelievable team but extensive experience, resources, knowledge and the attention to detail is unmatched. All I can say is Thank you, Tallen, for completing multiple projects for us, it was a fabulous experience! Your team produced, every time, exactly what I wanted. I will definitely recommend you to all my friends!

We are happy to recommend Tallen Builders to any of your future clients and trust that their experience with your company will be as positive as ours. If we can answer any additional questions about our experience, please feel free to contact me. Tori – Little Tree Farm
